Art Unit: ~~3611~~ 3618

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I: Figures 1 and 3, directed to a hybrid vehicle with power take off;

Species II: Figure 2, directed to an electric vehicle;

Species III: Figures 4 and 5, directed to a vehicle having a hoist.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

None of the claim(s) appear generic.

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Species I and II lack corresponding technical features in that Species I is directed to a hybrid vehicle system involving a further connection in the power train involving an internal combustion engine and a further generator element specifically used for converting mechanical engine power to electrical energy whereas Species II requires only driving motors and particular mechanical drive connections to the surface engaging drive means; similarly the hoist or winch of Species III is a separate invention directed to article handling rather than the operation of a power train.

Art Unit: ~~3611~~ 3618

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

#### Current Claim Status

4. Claims 1-3, 5-7, 9, 10, 17-19, 22-26, 28 and 29 are pending. Applicant, in the preliminary amendments, appears to have both canceled claim 27 and then amended it. Claim 27 is understood to have been canceled.
